Marcelo Pirro

SOFTWARE ENGINEER

BACKEND & DISTRIBUTED SYSTEMS

// Profile

Backend Software Engineer with experience in **payment processing systems (TEF)**, microservices, and enterprise applications. Skilled in **Java, Spring Boot, Quarkus, SQL**, and RESTful APIs, building secure, resilient, and scalable solutions for organizations such as **Itaú Group** and **Embraer**.

// Languages

English ↗	Advanced — C1
Portuguese	Native / Fluent
Japanese	Beginner — A1

// Technical skills

LANGUAGES
Java, C, Python, TypeScript

FRONTEND
React

BACKEND
Spring Boot, Quarkus, Hibernate/JPA, JDBC, Maven, Gradle

TOOLS
Git, Linux, SOAP UI, Postman, GitHub

APIS & ARCHITECTURE
REST APIs, SOAP APIs, Microservices, Clean Architecture, SOLID, DDD

DATABASES
PostgreSQL, Oracle, MySQL, MongoDB

CLOUD, CI/CD & DEVOPS
Docker, Kubernetes, AWS, GitHub Actions

TESTING & METHODOLOGIES
Agile, Scrum, TDD, Clean Code, JUnit5, Integration Testing

MESSAGING & DISTRIBUTED SYSTEMS
Apache Kafka, RabbitMQ, Event-Driven Architecture

// Academic background

Bachelor of Computer Science ↗

Jan 2021 – Jul 2025

Federal University of São Carlos (UFSCar)

// Certifications

AWS Certified Cloud Practitioner ↗ CLF-C02

Sep 2026

Amazon Web Services (CLF-C02)

// Professional experience

Software Engineer

Jul 2025 – Present

Conexão Tech (Itaú Group)

- Develop and maintain mission-critical backend microservices for **TEF payment processing systems** utilizing **Java and Spring Boot**, ensuring high availability, fault tolerance, and strict SLA compliance for daily financial transactions.
- Design, implement, and integrate secure **REST and SOAP APIs**, handling financial transaction routing, cryptographic validation, and seamless data interchange across distributed payment gateways.
- Collaborate in the architectural design of payment solutions, optimizing relational database queries (**Oracle / PostgreSQL**) and event flows to maintain sub-second latency within a high-volume financial ecosystem.

Software Development Intern

Oct 2023 – Jul 2025

Embraer

- Developed and maintained enterprise software applications within the **Operational Excellence (P3E)** team, delivering scalable workflow optimization and business process automation solutions.
- Architected and deployed automated data processing systems that eliminated over **350+ hours of manual operations per month**, significantly improving business efficiency and reporting accuracy.
- Contributed to backend development, database modeling, and maintenance for payment-related tools and internal digital integration initiatives.

Vice President & Project Director

Jan 2024 – Jun 2024

Beets Jr. (Junior Enterprise)

- Led multidisciplinary software engineering squads through end-to-end delivery of client projects, actively enforcing **Agile and SCRUM** best practices, code reviews, and sprint velocity.
- Managed technical discovery and requirements gathering with enterprise clients, translating business objectives into architectural specifications and strategic deliverables.
