Marcelo Pirro

SOFTWARE ENGINEER | BACKEND & DISTRIBUTED SYSTEMS

São Paulo, Brazil • +55 18 99681-0302 • marcelopirro@outlook.com • linkedin.com/in/marcelopirro • marcelopirro.vercel.app • github.com/marcelopirro

PROFESSIONAL SUMMARY

Backend Software Engineer with solid experience architecting and implementing mission-critical payment processing systems (TEF), distributed microservices, and enterprise applications. Highly proficient in Java, Spring Boot, Quarkus, SQL, and RESTful/SOAP APIs, delivering secure, resilient, fault-tolerant, and high-concurrency solutions for major organizations such as Itaú Group and Embraer. Strong background in relational databases (PostgreSQL, Oracle), event-driven architecture (Kafka, RabbitMQ), containerization (Docker, Kubernetes), and AWS cloud infrastructure.

TECHNICAL SKILLS

Programming Languages: Java, C, Python, TypeScript, SQL

Backend Frameworks & Technologies: Spring Boot, Quarkus, Hibernate/JPA, JDBC, Maven, Gradle, Microservices

Messaging & Distributed Systems: Apache Kafka, RabbitMQ, Event-Driven Architecture, High Availability

Cloud, CI/CD & DevOps: Amazon Web Services (AWS), Docker, Kubernetes, GitHub Actions, Linux

Databases: PostgreSQL, Oracle Database, MySQL, MongoDB

APIs & Architecture: REST APIs, SOAP APIs, Clean Architecture, SOLID Principles, Domain-Driven Design (DDD)

Testing & Methodologies: JUnit5, Test-Driven Development (TDD), Integration Testing, Clean Code, Agile, Scrum

Tools & Frontend: Git, GitHub, Postman, SoapUI, React

WORK EXPERIENCE

Software Engineer
Jul 2025 – Present

Conexão Tech (Itaú Group)
São Paulo, Brazil

- Develop and maintain mission-critical backend microservices for **TEF payment processing systems** utilizing **Java and Spring Boot**, ensuring high availability, fault tolerance, and strict SLA compliance for daily financial transactions.
- Design, implement, and integrate secure **REST and SOAP APIs**, handling financial transaction routing, cryptographic validation, and seamless data interchange across distributed payment gateways.
- Collaborate in the architectural design of payment solutions, optimizing relational database queries (**Oracle / PostgreSQL**) and event flows to maintain sub-second latency within a high-volume financial ecosystem.

Software Development Intern
Oct 2023 – Jul 2025

Embraer
São Paulo, Brazil

- Developed and maintained enterprise software applications within the **Operational Excellence (P3E)** team, delivering scalable workflow optimization and business process automation solutions.
- Architected and deployed automated data processing systems that eliminated over **350+ hours of manual operations per month**, significantly improving business efficiency and reporting accuracy.
- Contributed to backend development, relational database modeling, and maintenance for payment-related tools and internal digital integration initiatives.

Vice President & Project Director
Jan 2024 – Jun 2024

Beets Jr. (Junior Enterprise)
São Carlos, SP, Brazil

- Led multidisciplinary software engineering squads through end-to-end delivery of client software projects, actively enforcing **Agile and Scrum** best practices, code reviews, and sprint velocity.
- Managed technical discovery and requirements gathering with enterprise clients, translating business objectives into architectural specifications, database schemas, and strategic deliverables.

EDUCATION

Bachelor of Computer Science
Jan 2021 – Jul 2025

Federal University of São Carlos (UFSCar) — São Carlos, SP, Brazil

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02)
Valid through Sep 2026

Amazon Web Services (AWS) — Validation: 4fb9fee6-ffe4-402f-9d81-7f3cb4af623f

LANGUAGES

English: Advanced (C1 — EF SET Certified) | **Portuguese:** Native / Fluent | **Japanese:** Beginner (A1)
